a Water annotations in a test image

b Oil annotations in a test image

c Object counts by split

d Fixed evaluation design

2,593 images • 22 sequence groups
1,886 training / 348 validation / 359 test

SSL sees training and validation images
3,920 frame pairs • test groups excluded

Ten downstream seeds per configuration
42–51 • one fixed split and SSL checkpoint

e Primary comparison and recorded extensions

	No module	Mean Teacher (C2)
Baseline	10 seeds	10 seeds
SSL	10 seeds	10 seeds
Additional checks	Wider SSL frame gap: 5 seeds	HIT-UAV baseline: 10 seeds
